

# Qualitative Results: Subgoal Progress and Temporal Status

Key frames are sampled from the recorded agent videos; colored labels are derived from the corresponding execution logs.

## (a) Episode 632 — Habitat success

Success | SPL 0.957 | DTG 1.05 m

**Instruction:** Exit into the pool room and stop before the pool.

### Prepared subgoals

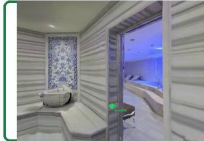

- S1** Exit into the pool room  
DONE at step 62
- S2** Stop before the pool  
WIP when STOP was issued

step 0  
S1: WIP

step 8  
TURN OSCILLATION

step 62  
S1: DONE → S2

step 65  
S2: WIP; STOP

### Executed trajectory

### Observed outcome

The first subgoal is completed; Habitat success occurs although the final subgoal remains WIP.

Green = verified completion; orange/red = incomplete or failure state.

## (b) Episode 505 — Habitat success

Success | SPL 0.964 | DTG 0.50 m

**Instruction:** Walk straight down the hallway; turn left at the glass door; turn right; stop by the table.

### Prepared subgoals

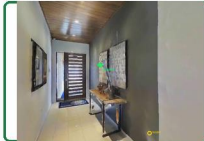

- S1** Walk straight down the hallway until reaching the next left-turn decision point  
DONE at step 15
- S2** Turn left at the glass door, then reach the next right-turn decision point  
DONE at step 32
- S3** Turn right at the hallway and align with the new route  
DONE at step 37
- S4** Walk to the table on the right and stop  
WIP when STOP was issued

step 0  
S1: WIP

step 15  
S1: DONE → S2

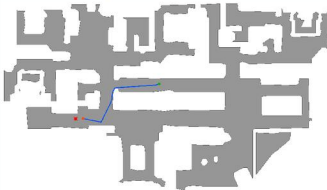

step 37  
S3: DONE → S4

step 45  
S4: WIP; STOP

### Executed trajectory

### Observed outcome

Three intermediate subgoals are completed; the final table-arrival subgoal remains WIP at STOP.

Green = verified completion; orange/red = incomplete or failure state.

## (c) Episode 1631 — Failure

Failure | SPL 0.000 | DTG 8.21 m

**Instruction:** Go down the stairs and stop.

### Prepared subgoals

- S1** Go down the stairs  
WIP throughout the trajectory

step 0  
S1: WIP

step 20  
IN-PLACE SPIN

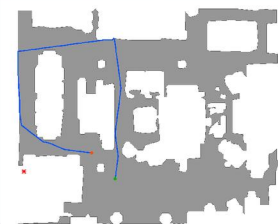

step 72  
WALL STUCK

step 129  
S1: WIP

### Executed trajectory

### Observed outcome

The agent never verifies the stair-descent completion criterion and terminates far from the goal.

Green = verified completion; orange/red = incomplete or failure state.
